

*ScD, Professor Teimuraz Ioseliani* (1929 – 2013) is distinguished Georgian neurophysiologist, the Member of Georgian National Academy of Sciences. Professor Ioseliani the Head of the Laboratory of Physiology at I. Beritashvili Institute of Physiology Georgian Academy of Sciences (now Ivane Beritashvili Center of Experimental Biomedicine), Professor and the Head of Department of Human and Animal Physiology at Ivane Javakhishvili Tbilisi State university. During years, he was Invited Professor at the universities of USA and Germany. In his research, Professor Ioseliani mostly focused on the physiology spinal cord and visceral systems. He is an author of more than 100 scientific papers, monograph (“Neural Mechanisms of Integrative Function of Spinal Cord”), and textbooks (“General Physiology of Muscle and Nervous Systems”, “General Neurophysiology” and “Physiology of Visceral Systems”). Professor Ioseliani was honored with Order of Honor (1998), Millennium Honorary Gold Medal (2000) and Georgian State Award in Science and Technology (2002). Professor Ioseliani was the member of numerous national and international scientific and honorary societies, including Georgian National Academy of Sciences, Georgian Academy of Ecological Science, Georgian Academy of Medical Sciences, Georgian Academy of Life Sciences (Vice-president), IBRO (Brain Research International Organization) and New-York Academy of Sciences.

Some of the most known papers of Professor Ioseliani are:

Effect of functional disconnection of the neocortex on convulsive activity of the brain. Ioseliani TK, Nanobashvili ZI. Dokl Akad Nauk SSSR. 1974 Aug 1;217(6):1457-60.

The effect of adrenaline and adrenal desympathization on cerebral convulsive activity. Nanobashvili ZI, Khizanishvili NA, Ioseliani TK. Neurofiziologiya. 1975;7(2):149-55.

Pessimism in frog nerve-muscle preparation. IOSELIANI TK. Fiziol Zh SSSR Im I M Sechenova. 1959 Apr;45(4):487-93.

Delayed reactions of active avoidance in white rats under conditions of an alternative choice. Ioseliani TK, Sikharulidze NI, Kadagishvili AIa, Mitashvili EG. Zh Vyssh Nerv Deiat Im I P Pavlova. 1995 Jul-Aug;45(4):686-92.

ON THE MECHANISM OF PESSIMUM INHIBITION. IOSELIANI TK, ONIANI TN. Nerv Sist. 1963;108:9-13.

Interrelation between neuronal responses of hippocampal fields CA1 and CA3 to photic stimulation in the cat. Ioseliani TK, Gloveli TB. Neurofiziologiya. 1981;13(5):556-8.

Alterations in the cerebral threshold for seizure activity during wakefulness and different sleep stages in animals. Ioseliani TK, Nanobashvili ZI, Khizanishvili NA. Neurofiziologiya. 1974 Nov-Dec;6(6):577-84.

DATA ON THE INTERACTION BETWEEN SPINAL CORD REACTIONS FOLLOWING PAIRED STIMULATION OF THE AFFERENT NERVES. IOSELIANI TK, NANEISHVILI TL, CHOKHELI KG. Fiziol Zh SSSR Im I M Sechenova. 1965 Jan;51:65-7

POST-ACTIVATION CHANGES IN THE IRRITATION OF THE NEURO-MUSCULAR APPARATUS. ODIANI TN, IOSELIANI TK. Nerv Sist. 1963;108:14-7.

Responses of neurons of the dorsal hippocampus to low-frequency photostimulation. Gloveli TB, Ioseliani TK. Fiziol Zh SSSR Im I M Sechenova. 1981 May;67(5):645-51.

Clinical manifestations and pathogenesis of neurological complications in Osler-Rendu disease. Glonti TI, Zaalishvili GR, Geladze MG, Ioseliani TP. Klin Med (Mosk). 1981 Sep;59(9):52-4.
